

06 – Project Testing

Auto-Ticket Classification Using Flow Designer

Testing Objective

The objective of testing is to verify that the Flow Designer classification process produces the expected Incident classification when relevant ticket information is supplied.

Testing Approach

Create or update an Incident with a known test description.

Verify that the configured trigger starts the flow.

Observe the decision branch selected by the flow.

Verify that the Update Record action changes the intended Incident field.

Test both matching and non-matching conditions.

Record actual results and capture screenshots.

Test Cases

Testing Evidence

Incident form initial state screenshot.

Flow Designer configuration screenshot.

Trigger/decision configuration screenshot.

Flow execution screenshot.

Classification result screenshot.

Final output/validation screenshot.

Defect Recording

If an observed result does not match the configured requirement, record the issue, affected flow component, observed behaviour, expected behaviour and corrective action before marking the test as passed.

Testing Result

Pass/Fail status should be completed after executing the test cases in the actual ServiceNow instance. This document does not claim execution results before the project is tested.

Team Members

Test ID	Test Scenario	Expected Result	Status
TC01	Open/create Incident	Incident record loads correctly	To Verify
TC02	Enter Hardware-related ticket text	Hardware classification is applied	To Verify
TC03	Enter Software-related ticket text	Software classification is applied	To Verify
TC04	Enter Network-related ticket text	Network classification is applied	To Verify
TC05	Enter Access-related ticket text	Access classification is applied	To Verify
TC06	Enter Email-related ticket text	Email classification is applied	To Verify
TC07	Enter unmatched ticket text	Default/Other or manual-review path is applied	To Verify
TC08	Repeat a matching classification	Classification remains consistent	To Verify
TC09	Inspect final Incident	Expected classification is visible and documented	To Verify
